Flowering and Foliage Types

Hedge Stock

Climbing Vines

Roses

Hybrid Tea

Floribunda and Polyantha

Climbing

Garden Chrysanthemums

Gladiolus Bulbs

Selected new, best of the older

Perennials

Western Grown for Western Planting

The Rocky Mountain and Plains region comprise a distinct climatic area in that the higher altitude, limited rainfall, sudden temperature change, and the length of the growing season have a definite influence on plant growth. Evaporation of moisture from plants is high and they must have a more highly developed root system to maintain a normal growth balance. Bark and wood cells also build up resistance to atmosphere and temperature.

Some varieties that do well in lower, more moist climate will not adapt themselves to our growing conditions, and so cannot be considered. Fortunately, however, there are many varieties that have proven their adaptability here, and others are being tried and observed to enlarge the list of plant material especially suited to growing conditions in this area, both in fruit and ornamental stock. We take pride in participating in the leadership in testing plant material and bringing new proven hardy items to our western trade so that our customers may have the best nursery stock obtainable.

There can be only one conclusion in obtaining the greater value in your purchase of nursery stock; if it is acclimated, correctly grown and properly handled you will realize the maximum results in transplanting; if the varieties are adapted you may expect a successful continued growth.

OUR LOCATION: One mile north on highway 287 from junction of highways U.S. 287 and U.S. 34 — Office and display yards one block west of highway. We are centrally located in the highly productive agriculture area of Northern Colorado, and within the fruit growing section of the Eastern Slope. Nursery stock in various stages of development can be seen in our fields throughout the year.

NATIONAL ENDORSED ROSES

Consumers Reports magazine with national circulation, designates Kroh Brothers Nurseries as one of a select number of firms in the United States to be a consistently good and reliable source for roses. We are proud to have our roses merit this unsolicited recognition.

"WHERE OUR CUSTOMERS SEND THEIR FRIENDS"

Our annual list of nursery stock is being sent to an increasing number of interested home owners, either by virtue of new requests, or as a result of current patronage. We are glad to send it to you and are especially grateful to those who have recommended our stock to their friends.

OUR NURSERY

**Is one of the best equipped to serve your needs in the
Rocky Mountain Region**

Easy access and prompt service for customers who come to the nursery.

Orders filled efficiently for shipping.

Excellent accommodations for housing our office, warehouse and storage.

Thorough understanding of fruit growing problems for this region, and practically flawless performance of fruit tree stock for orchardists.

Largest growers of acclimated stock in the Rocky Mountain Region.

Diversified stock for complete landscape planting as well as many items for the gardner who plants incidental items from time to time.

Most complete selection of container established stock for Summer planting.

We are always willing to assist you with your Landscape Planning arrangement to the extent of our practical experience. Landscape projects should be worked out well in advance of the Spring Planting rush to avoid disappointment.

Guarantee

All nursery stock is guaranteed to be true to name, and to be free from injurious insect pests and diseases as certified by state inspection; any proving otherwise will be replaced free or original purchase price will be refunded, but no greater liability will be assumed.

It is further guaranteed that all plants delivered are in good live condition; claims to the contrary must be made immediately on receipt of stock. After nursery stock is delivered in good condition, the future progress thereof is beyond our control and further results cannot be guaranteed. With reasonable care, however, we have confidence in successful continued growth of our stock after transplanting; therefore we shall replace once any stock sold at regular retail that fails to leaf out the first summer after planting at one-half the current retail each-rate price f.o.b. the nursery PROVIDED CUSTOMER NOTIFIES US before Sept. 1 following date of planting, with half price remittance accompanying report. (Full replacement credit given when planting is done and charge made for same by Nursery.) No replacement can be made on stock given abuse or neglect, planted unseasonably, against our advice or where customer is notified of non-replacement before purchase, or loss caused by winter damage following planting. We reserve the right to cancel replacement on delinquent accounts.

Terms of Sale

Prices are cash with order; C.O.D. orders must be accompanied by at least one-fourth cash; money orders and checks are recommended for remittance; orders with coins and currency should be registered.

Credit: Charge Accounts and Time Payment Plans **must be arranged with our office prior** to delivery of merchandise. We will gladly help you arrange for a "Home Improvement Loan" to finance your landscaping.

Shipping Charges: Quotations for the majority of items in this catalog are based F.O.B. Loveland except as otherwise noted. We feel that this is the fairest method; thereby eliminating the alternative of offering lighter cheaper grades to offset delivered prices. Roses Small Fruits, Mums and Perennials, being more uniform in size are quoted postpaid on orders amounting to \$5.00 or more, Glads \$3.50 or more. Such items as the Smaller Shrubs, Hedge Plants and Fruit Trees in the smaller sizes not indicated Postpaid that can be bundled within the parcel post regulations, may be shipped parcel post, "postage charges collect." Railway Express or reliable fast Motor Freight is recommended in a large number of cases. Such shipments are sent with shipping charges payable for exact amount on arrival. Shade Trees, Balled Evergreens and stock established in containers are sent only by Express or Motor Freight.

Shipping Season: For spring, March 15 to May 10, Early April planting is best. Order in advance if possible.

Planting Service: Charges for planting are estimated on the individual circumstances and are not included in the price as quoted in the catalog.

Please Note: Sizes and prices are subject to change without notice prior to a subsequent price list.

FRUIT TREES and PLANTS

A GUIDE FOR SELECTING VARIETIES OF FRUITS

We doubt whether there is another section that has such a range of climatic conditions as the Rocky Mountain Plains region. Exposure and altitude are more varying factors than latitude. Our mountain range, as a rule, affords zones of protection along the base of the mountains and within sheltered valleys where fruit growing more readily expands to commercial proportions. In many parts of this section, existing plants or fruits have already pointed out what will or will not do well in a certain area. Here are suggestions, however, if you are in doubt as to what might grow best in your locality. In all cases soil and watering should be favorable, and windbreaks where necessary.

SECTION I: In the higher exposed plains of the Eastern Slope, up to about 6,500 feet and the higher mountain valleys — Crab Apples, Gooseberries, Currants, Garden Roots, Hardy Cheyenne developed Strawberries, and the new Dwarf-rich sour cherry.

SECTION II: In the more agricultural sections of the exposed Eastern Slope plains and mountain valleys up to 7,000 feet—All items in Section I in addition to Yellow Transparent Wealthy, McIntosh and N.W. Greening varieties of apples; Beta Grapes, Hardy Cheyenne developed Strawberries, and new Dwarf-rich sour cherry.

SECTION III: Where there are moderate climatic conditions on the Eastern Slope, especially in the irrigated sections of around 5,000 feet or less, mountain valleys and the Western Slope up to 6,000 feet — All items in Section I and II in addition to Sour Cherries, European Plums, Additional Apple varieties, Pears, Strawberries, Raspberries, Grapes, (advisable to cover raspberries in winter.)

SECTION IV: In the Western Slope districts of 5,000 feet or less and the southern part of the Rocky Mountain region, there are many localities where the more tender fruits such as peaches, can be grown successfully in addition to all items in Sections 1, II, and III.

Young Cherry Orchard—Result of fine nursery stock

Cherries

Cherries bear fruit very soon after planting and are very desirable for pies and canning.

Caliper means diameter in inches at the base of the tree trunk. In our practice of producing stocky, well branched trees so necessary for successful development in our western climate, the height to which we grow them is of secondary importance.

Choice of varieties described below alike or assorted.

Size Trunk Caliper		Apr. Ht.	Prices each in lots of		
			1-4	5-15	15-25
No. 1	1-1 1/4 in.	5 ft. up	4.50	4.40	4.25
No. 2	7/8-1 in.	4 1/2 ft. up	3.50	3.40	3.25

No. 6	5/16-7/16 in.	2 1/2 ft. up	1.25	1.20	1.15

SOUR CHERRIES

➤ **ENGLISH MORELLO.** Ripens late July.

Fruit large, nearly black, very attractive. Sizes 1 to 6.

➤ **MONTMORENCY.** The best all around sour cherry grown. Ripens mid-July. large, bright red. Sizes 1 to 6.

➤ **EARLY RICHMOND.** Ripens about July 1st; medium sized, red. Size 1 to 6.

➤ **HANSEN BUSH CHERRY.** Under Shrub.

➤ **OSTHIEM.** Nearly black, tender and juicy with sweetest flavor of the sour cherry varieties. Sizes 4, 5, 6.

SWEET CHERRIES. Generally not recommended northly on the Eastern Slope. Sweet Cherries not branched.

➤ **BING.** Black sweet. Sizes 3, 4, 5.

➤ **WINDSOR.** Hardier black. Sizes 3, 4.

➤ **YELLOW GLASS.** Hardest yellow. Sizes 3, 5.

NEW HARDY DWARF SOUR CHERRY

✓ **DWARFRICH.** This variety was developed at Cheyenne Horticulture Field Station and has proven entirely hardy at Cheyenne, Wyoming.

The fruit is similar in shape, color, flavor, and flesh texture to the well known Early Richmond pie cherry recommended for the northern and central Great Plains where standard sour cherry varieties are not sufficiently winter hardy. Its bush habit covered with white bloom in the spring followed with bright red fruit contrasting to the glossy green leaves in summer, being suitable and desirable for both ornamental planting and fruit production for small properties. Dwarfrich may also be pruned into a dwarf tree.

2½-3 ft. \$3.50

2-2½ ft. \$3.00

18-24 in. \$2.50

Apples

One of the most useful fruits in the world either as a yard tree to serve a dual purpose for ornamental shades and enjoyable fruit, or an economical fruit produced in the home orchard, and should be planted extensively.

Choice of varieties described below, alike or assorted

Prices each in lots of

Size	Aprpr. Ht.	1-4	5-15	15-25
No. 1 ¾-1 in. trunk caliper	5-7 ft.	\$2.60	\$2.50	\$2.35
No. 2 11/16-¾ in. trunk caliper	4-6 ft.	2.35	2.25	2.15
No. 3 9/16-11/16 in. trunk caliper	3-5 ft.	1.95	1.85	1.70

Winter Varieties

✓ **DARK RED DELICIOUS.** Often referred to as Double red. A much improved Delicious, turning completely red before it is ripe. Size 1, 2, 3.

✓ **JONATHAN.** Medium size of finest quality, bright red, fine flavor; moderate grower. Size 1, 2, 3.

✓ **MCINTOSH.** Deep red, good size with crisp, tender, snow-white flesh. Has extremely pleasing flavor. Above average in hardness and dependability. Size 1, 2, 3.

✓ **YELLOW DELICIOUS.** This beautiful yellow apple is a bright golden yellow, sweetly acid flavor, good bearer, beginning at early age. Size 2.

Summer Varieties

✓ **RED JUNE** August. Medium size, deep red, good flavor; productive. Size 1, 2, 3.

✓ **YELLOW TRANSPARENT.** Ripens in August. A splendid early cooking and eating apple; pale yellow fruit. Hardy, bears young. Size 1, 2, 3.

✓ **WHITNEY CRAB.** August. Hardy, good bearer; fruit small to medium, striped red and green, fine for eating and canning, sweet and crisp. Size 1, 2, 3.

Fall Varieties

✓ **WEALTHY.** September. Fine, reliable bearer of large red striped, tender, juicy, slightly sub-acid fruit. One of the finest and hardiest apples. Size 1, 3.

✓ **DOLGO CRAB.** Has very brilliant red fruit of small size, borne freely. SEE FLOWERING CRABS

ONE-TREE APPLE ORCHARD

Grafting skill converts just one tree into an "ORCHARD" with up to 6 varieties on the same tree, being much better adapted to Western soils and climate than dwarf fruit trees. A horticultural novelty that has proven very practical and popular.

In building "OUR ONE TREE APPLE ORCHARD" we use a hardy crab tree trunk to which is grafted regular varieties such as Red & Yellow Delicious, Red June, Jonathan, Jeffries and McIntosh. The sets of varieties are not classified on the trees, but each will have the designated number of the above varieties.

In ordering please state the size and number of varieties.

SIZE	4 Var.	5 Var.	6 Var.
1-1¼ in. cal.	\$4.00	\$5.00	\$6.00
6-8 ft.	3.50	4.25	5.00
3-4 ft.	2.00	2.50	3.00

Alternate varieties and sizes available. Inquire at Nursery.

Peaches Pears

Peaches, like sweet cherries are generally not recommended northly on the eastern slope of the Rockies and Plains. However many a back yard or home orchard tree in Eastern Colorado has on occasion borne lovely crops of this fruit. Western Slope districts are of course nationally famous for Peaches and other more tender tree fruits.

- **ELBERTA.** The greatest commercial peach on the market today. Fruit large, yellow with red check, juicy and highly flavored. Sept.
- **HALEHAVEN.** Highly popular recent introduction. Produces firm large fruit, yellow with generous red shading. Excellent flavor.
- **POLLY.** White freestone having more cold resistance than the average variety. Has luscious flavor, juicy but firm. Late August.
- **BARTLETT.** The leading late summer pear. Large, yellow with blush. Juicy sweet, high quality.

Plums

Opata Cherry-Plum

American Type

- **KAHINTA.** This is an outstanding plum very large red fruit, good flavor. Trees thrifty. Size 2, 3, 4.
- **OPATA, Cherry-Plum.** The cherry plums are widely grown hardy medium size plums. Bearing very young with excellent flavor and very useful for jams and jellies. Opata fruit is purplish red with green flesh. Sizes 2, 3, 4, 5.
- **SAPA, Cherry-Plum.** Fruit purple red, thin skin, wine red flesh. Sizes 3, 4, 5.
- **SUPERIOR.** Plum of very large size. Color red with yellow flesh; fine pleasing flavor. Tree vigorous, productive. Sizes 2, 3, 4.
- **WANETA.** August fruit very large, deep bright red thin skin: delicious flavor. Sizes 3, 4, 5.

European Type

- **IMPERIAL GAGE.** Very gratifying in rich mild delicious sweet flavor. Medium to large. August. Size 2.
- **YAKIMA.** A dull reddish purple plum of exceptionally large size, fine flavor. Hardy and productive in dry land tests at Cheyenne Field Station. Size 2, 4.
- **STANLEY PRUNE.** We recommend it as the top prune, particularly in Section III. Under observation for over ten years, we find it has shown no ordinary winter killing. Bears young, frequently in three years, sets heavy crop just about as regularly as apples. Fruit is large deep bluish purple, firm and sweet, excellent quality fresh or canned. Size 1, 2, 3, 4.

Choice of above varieties

Size	Caliper	Appr. Ht.	Each

SMALL FRUITS

We wish to call your attention to the usefulness of Small Fruits in the garden. In addition to their unequalled value as delightfully flavored sauce, jellies, and preserves their usefulness as ornamental vines and shrubs should not be overlooked in planning the home garden. Even Strawberries make a useful and attractive low-growing border around perennial and flower beds.

Fredonia

Grapes

Plump clusters of grapes ripened on your own vines taste twice as good. Double value is often gained for vine covering of fences, arbors, and trellises.

- ✓ **BETA.** Where a rugged grape is required, this deserves very serious consideration. A cross between Concord and wild grape will adequately support the home needs for jelly and juices. Hardy without protection. Ideal for arbors and fences.
- ✓ **CACO.** A new red grape among the earlier ripening varieties. Bunches are compact and of good size and form. Pleasant sweet flavor.
- ✓ **CONCORD.** The widely planted blue-black grape.
- ✓ **FREDONIA.** A new very early delicious black grape, with large berries and bunches. Ripens two-weeks ahead of Concord.
- ✓ **NIAGARA.** Productive "white" variety. Large berries mature to light greenish-yellow; has sweet mellow flavor.

All vines are heavily rooted 2-year No. 1 size

	Post Paid	Ea.	Per 3	Per 10

Post Paid			
Perfection60	1.60	5.00
New Red Lake65	1.75	5.50

Gooseberries

✓ **HOUGHTON.** An enormously productive and reliable sort. Vigorous yet rather slender, spreading growth, not subject to mildew. Fruit of medium size, smooth, pale red when ripe, tender and good.

- ✓ **PIXWELL.** Fine new variety from the north. Very hardy, vigorous, heavy yielding. Berries large light green maturing to pink. Name Pixwell derived from long stems for easy reach and sparse thorns. Colorful autumn foliage.

2 yr. No. 1	Ea.	Per 3	Per 10
Postage Paid.			
Houghton90	2.50	7.50
Pixwell	1.00	2.75	8.50

Winter Hardy Strawberries

The Cheyenne Horticulture Field Station of the U.S.D.A. of Cheyenne, Wyoming, made selections of native Rocky Mountain wild strawberries from a broad area of the Rocky Mountain region in 1934. The best of the native plants were crossed with commercial strains, and after years of testing, selecting and recrossing the station unveiled a new strain of June bearing varieties with incomparable hardiness and remarkable flavor, including Cheyenne I, II and III and Sioux. Continued efforts

resulted in the introduction of two everbearing varieties "Radiance and Arapahoe" in 1954, retaining the unequalled hardiness of the native plant; also capturing the flavor and aroma of the wild strawberries with fruit size of the commercial strains.

Radiance Cheyenne Everbearer

The exceptional hardiness of the June bearing varieties opened great new home garden strawberry possibilities in the severe dry winter climate of the Great Plains and Mountain Areas where growing strawberries had not been practical before; however we have discontinued these in favor of the more popular everbearing characteristic of Radiance and Arapahoe with equal hardiness, quality and additional production.

Radiance has been available in limited quantities since introduction with Arapahoe, a much slower reproducer of plants, being initially offered last spring.

Raspberries

We recommend covering Raspberry canes for winter protection on Eastern slope and plains. Your efforts will be well rewarded in additional delicious fruit.

BLACK CUMBERLAND. One of the most reliable and widely planted, large juicy fruit.

MORRISON. This new black raspberry has larger fruit than older strains. Better quality, disease-free and bigger yields.

SEPTEMBER. Everbearing. New origination of Dr. Yeoger at the University of New Hampshire. Healthy, hardy, vigorous grower and heavy producer of large firm bright red berries on winter protected old canes. Heavy early fall crop produced on new canes.

SODUS. New extremely productive, very large, firm medium purple raspberry with a distinctive sweet flavor.

ST. REGIS—Everbearing. A good standard variety for years bearing delicious medium to large red berries on canes carried over winter and continuing till fall on new canes.

One year No. 1 plants

St. Regis	1.25	2.25	4.00

✓ **RADIANCE U.S.D.A.** 1954 Introduction.

The first everbearing strawberry of the Cheyenne series. The hardiest everbearer ever tested in the high plains. Plants are medium size, vigorous, dark green, and sets average amount of runner plants. Produces abundance of medium to large conical deep red sub-acid to sweet berries with highly gratifying delicious flavor and aroma inherited from its native parentage. Sustained production, June till frost.

PRICED: per 25, \$2.25; per 50, \$4.00; per 100, 7.50; per 200, \$14.00; postpaid.

✓ **ARAPAHOE U.S.D.A.** 1954 Introduction.

A robust vigorous plant; while lacking some in the exceptional winter hardiness of Radiance, has not shown damage here without mulching. Its reluctance to set runner plants makes Arapahoe desirable for individual hill culture. Produces large broad conical firm bright red sub-acid delightfully flavored berries in abundance. Sustained production June till frost.

Orders limited to 50 plants to a customer as long as stock is available.

PRICED: per 25, \$4.00; per 50, \$7.50; Post Paid.

✓ **EVERMORE.** Minnesota everbearing introduction producing large berries of rich red color and pleasing flavor.

Priced per 25, \$1.40; per 50, \$2.50; per 100, \$4.50; per 200, \$8.00.

ORNAMENTALS for BEAUTY

Practically every family has pride in the appearance of the home grounds. Selection of trees, shrubs, evergreens, vines and flowering plants that are adapted and their use in an orderly manner makes it possible for practically everyone to have the pleasure of a home with attractive surroundings.

Whether it be additions to the home landscape by degrees or complete plantings, there is no investment that can be made in home improvement that is as reasonable in proportion. Structural improvement and home furnishing of course are essential, but the investment for landscaping is the only one in which the per dollar value will increase instead of depreciate.

Shrubs For Flowers and Foliage

The planting sizes of the different varieties listed here are described by height. We wish to stress the fact that height is being given for stock that has been transplanted one or more times and has a heavy, well developed root system and well branched top. This stock should not be confused with light grades of easily propagated stock that is often featured by mail at low prices.

Numbers following names represent approximate height at maturity under average normal conditions. Shrubs are not quoted Postpaid.

ALMOND, Double Pink Flowering. 5-6 ft. Branches thickly studded with double pink rose-like blossoms in spring before leaves appear. Does best in protected location. 2 to 3 ft. each \$1.50.

BARBERRY, Mentorensis. 4-5 ft. Semi evergreen upright shrub carrying heavy thick, dark green foliage changing with frost to pleasing autumn shades. Leaves continue to adhere nearly all winter. Gives air of refined simplicity and beauty to a planting. 2-3 ft. each \$2.35.

BARBERRY, Thunbergi, 4 ft. Dwarf shrub used extensively in foundation planting, groups and hedges. Full branching habits; rich green foliage turning red in autumn; red berries. 18-24 in. ea. \$1.25.

BARBERRY, Red Leaf, 4 ft. The same as Barberry Thunbergi except for colorful bronzy red foliage all summer long. Locate in sunlight for best color. 18-24 in. each \$1.50.

Butterfly Bush

BUTTERFLY BUSH, Buddleia. Summer Lilac 4-6 ft. Usually kills to ground, but makes quick, bushy well branched growth, producing large spikes of fragrant lilac-like bloom, July on. Blooms first year, strong plants.

DUBONNET—most popular dark wine.

EMPIRE BLUE—Lilac-toned Aster-blue.

ROYAL RED—rich dark royal purple.

WHITE BOUQUET — Beautiful white.
Each 95c; 3 for \$2.75.

BUCKTHORN, Rhamnus Cathartica, 8-10 ft. A very hardy and durable shrub, dark green foliage. For General landscape use in severe climate, makes a long lived beautiful hedge or screens. 3-4 ft. ea. \$1.35; 4-5 ft. ea. \$1.85.

CARAGANA, Arborescens, "Siberian Pea Tree," 10-12 ft. Very hardy tall shrub for specimens, screens or hedges; attractive locust like foliage, green stems. Small yellow pea shaped blooms May-June. 2-3 ft. ea. \$1.15; 3-4 ft. ea. \$1.50; 4-5 ft. ea. \$2.00.

CARAGANA, Dwarf Pygmaea, 3 ft. Bushy shrub with minute dark green foliage, showy orange pea-shaped flowers in May. Very hardy. 18-24 in. ea. \$1.35; 2-3 ft. ea. \$1.85.

CARYOPTERIS (Blue Mist Spirea) 20-30 in. A real contribution to the meager list of late-flowering shrubs. Covered with small powder-blue fringed flowers in numerous clusters on a round mound like plant from August until frost. Very hardy. Av. 12 in. ea. \$1.15; 2-2½ ft. ea. \$1.95.

COTONEASTER, Acutifolia, 6 ft. Very hardy shrub assuming shapely proportion. Foliage rich dark green, glossy on upper side, medium size, fairly dense. Beautiful autumn color; profusion of blue-black berries in fall. Sun or shade. 2-3 ft. ea. \$1.50; 3-4 ft. each \$1.95.

CURRANT, Alpine, 3 to 4 ft. Hardy dwarf bright green foliage shrub developing neat compact shape. Adapted in sun or shade. 18-24 in. ea. \$1.95.

CURRANT, Golden Flowering, 5-6 ft. Very hardy shrub bearing a profusion of bright yellow tubular flowers, April-May, assumes bright autumn colors. 2-3 ft. ea. \$1.40; 3-4 ft. ea. \$1.75.

DOGWOOD, Colo. Native Red Stem, 5-7 ft. Shapely shrub, medium to large foliage; white flower clusters followed by white berries. Bright red branches liven the winter landscape. 18-24 in. ea. \$1.35; 2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.15.

DOGWOOD, Yellow Stem (Cornus Golden Twig) 6-8 ft. A striking yellow branched form of Dogwood. Its distinct yellow bark has fine winter effect. 2-3 ft. ea. \$1.65; 3-4 ft. ea. \$1.95.

EUONYMUS, Alatus, Japanese Spindle Tree, 10-12 ft. Interesting winged corky bark. Yellow flowers May-June. Leaves turning brilliant crimson in autumn, scarlet fruit. 18-24 in. ea. \$2.45.

EUONYMUS Atropurpureus, Wahoo or Burning Bush, 10-12 ft. Especially attractive are the many bright red berries carried well into winter. Foliage attractive green in summer, turning rich fall color. 2-3 ft. ea. \$1.65.

FLOWERING QUINCE, Cydonia japonica, 5-6 ft. Bush becomes blaze of color with beautiful uniform scarlet flowers in spring before leaves mature. 2-3 ft. ea. \$1.45.

FORSYTHIA, Fortunei, Golden Bells, 6-8 ft. Upright arching branches bearing many early bright yellow flowers in April. Blossoms best following mild winter and spring. 2-3 ft. ea. \$1.45; 3-4 ft. ea. \$1.95.

GINNALA MAPLE, 10-12 ft. Large shrub that may also be pruned to produce a dwarf tree with one or more trunks. Typical maple foliage turns a brilliant red in fall. 3-4 ft. ea. \$2.75; 4-5 ft. ea. \$3.75.

HANSEN'S BUSH CHERRY 3-4 ft. A hardy fruit producing shrub bearing many small sweet dark plum like fruit, where other cherries fail. White blooms in spring, colorful fruit and foliage contrast followed by red leaves in fall make this hybrid bush cherry very useful and desirable planted as border or hedge. 2-3 ft. ea. 85c; 3 for \$2.25. Per 10 \$7.00. 3-4 ft. ea. \$1.00; 3 for \$2.85. 10 for \$8.50.

Zabeli Honeysuckle

HONEYSUCKLE, Zabeli., True Red Honeysuckle. 8-10 ft. An improved honeysuckle with decided rose-crimson blossoms, which is in contrast with the pink shades of other honeysuckles. Blooms May-June followed by scarlet berries; very hardy. 2-3 ft. ea. \$1.45; 3-4 ft. ea. \$1.85; 4-5 ft. ea. \$2.25.

HONEYSUCKLE Compacta Nana. 3-5 ft. A recently introduced hardy, compact addition to the popular honeysuckles. Small yellow flowers in May followed by red berries. 18-24 in. ea. \$1.95; 2-3 ft. ea. \$2.25

HONEYSUCKLE, Korolkowi, Blueleaf Honeysuckle. 8-10 ft. Broad blueleaf, beautiful foliage, pinkish white bloom, red berries. Very hardy. 2-3 ft. ea. \$1.80; 3-4 ft. ea. \$2.10

HYDRANGEA, A.G. 3-5 ft. Large clusters, snow-white flowers, July-Aug.; large foliage. Usually starts from ground each spring in this climate. Not recommended in strongly alkaline soils. Strong 3 year plants, each. \$1.50.

MOCKORANGE Glacier. 4-6 ft. Shapely well branched and foliated shrub with loads of double very fragrant white blossoms profused in clusters, June-July. 2-3 ft. ea. \$1.65; 3-4 ft. ea. \$2.00

MOCKORANGE, Virginal. 6-8 ft. Medium growers, bearing many beautiful fragrant semi-double flowers over a long season from May on. 2-3 ft. ea. \$1.65

NINEBARK, Dwarf. 4-5 ft. A medium low growing shrub giving a fine trim appearance; compact form; dense attractive green foliage. Neat white flower clusters, early June. 2-3 ft. ea. \$1.45

PRIVET, Amur River. Chiefly used for trimmed hedges. Is satisfactory up to about 5,000 ft. See hedge plants.

POTENTILLA Ferreri, 3 ft. up Also referred to as P. Goldrop. A new shrub that is a "find" among dwarf varieties. Trimly shaped bushes have fairly dense green finely divided foliage which is surmounted by a generous profusion of small bright golden yellow blossoms in June, continuing throughout the summer. Hardy; sun or shade. 9-12 in. ea. \$1.10; 12-15 in. ea. \$1.40; 15-18 in. ea. \$1.70; 18-24 in. ea. \$1.95; 2-2½ ft. ea. \$2.25

✓ **PRUNUS CISTENA. Purple Leaf Plum.** 5-7 ft. Very colorful shrub. Plum like foliage is deep blood red while forming, changing to bronzy green; small pink flowers in May. Adds variety and contrast. 2-3 ft. ea. \$2.10; 3-4 ft. ea. \$2.75, 4-5 ft. ea. \$3.45

✓ **PRUNUS NEWPORT.** 10-12 ft. Can be grown as small tree or large shrub, growing taller than P. Cistena. Foliage carries a rich cast of reddish purple throughout the season. 4-5 ft. ea. \$3.45; 5-6 ft. ea. \$4.15.

✓ **PRUNUS TOMENTOSA, Nanking Cherry,** Desirable neat branching shapely shrub heavily laden with bloom before dark green foliage appears. Bears red cherry-like fair size, good flavored fruit useful for preserves. 18-24 in. ea. \$1.20; 2-3 ft. ea. \$1.45; 3-4 ft. ea. \$1.75

PRUNUS TRILOBA. Also known as Flowering Almond, Flowering Plum, and "Rose Tree of China." 5-7 ft. Can be grown as charming shrub or dwarf ornamental tree. In spring the whole bush is decked with quantities of very double pink blossoms just as the leaves begin to appear. Foliage also attractive. 2-3 ft. ea. \$2.10; 3-4 ft. ea. \$2.75

SHRUB ROSES, listed under Rose section, page 25.

SNOWBALL, Common. 8-10 ft. Well known shrub forming many balls of pure white flowers in May-June. 2-3 ft. ea. \$1.75.

SNOWBERRY, Red (Coralberry.) 4-5 ft. Attractive variation from the white Snowberry in that it has smaller red berries that cluster in ropes along the stems and with slightly darker foliage. 18-24 in. ea. \$.90; 2-3 ft. ea. \$1.10; 3-4 ft. ea. \$1.45

SNOWBERRY, White (Racemosus.) 4-5 ft. Of fairly compact growth; attractive green foliage. Tiny pink flowers in June followed by large white berries remaining into winter. 18-24 in. ea. \$.85; 2-3 ft. ea. \$1.00; 3-4 ft. ea. \$1.35

SPIREA Frobeli. 3 to 4 ft. A summer blooming dwarf spirea with crimson pink flower clusters 18-24 in. ea. \$1.20; 2-3 ft. ea. \$1.50

SPIREA, Prunifolia. Double Bridal wreath 5-7 ft. Miniature double white blooms in profusion on a shapely plant makes this one of the outstanding Spireas.

18-24 in. ea. \$1.45

SPIREA Van Houtte. 5 to 6 ft. Well known popular shrub, sometimes called "Bridal Wreath." Graceful habit of growth. A "fountain" of white flowers in late May.

18-24 in. ea. \$.90; 2-3 ft. ea. \$1.10; 3-4 ft. ea. \$1.45

SUMAC, Smooth Glabra. 5-6 ft. An uncommon type that differs in its dwarfier habit and very dark glossy foliage. Has red fruit clusters and rich red autumn foliage. 2-3 ft. ea. \$1.20

SUMAC, Staghorn. 15-18 ft. A large shrub or tree; colorful red foliage and scarlet fruit clusters in autumn. 3-4 ft. ea. \$1.45

TAMARIX Hispida. 10-15 ft. One of the hardiest and best Tamarix; has feathery silvery foliage; bright coral-pink flowers, June-July. For best success, Tamarix should be cut back at least half when planting.)

2-3 ft. ea. \$1.45; 3-4 ft. ea. \$1.75

VIBURNUM Lantana. "Wayfaring Tree."

8-10 ft. Upright growing shrub with heavily veined rich green foliage. Heads of white flowers in June, followed by red and black berries.

2-3 ft. ea. \$1.65

VIBURNUM, Opulus. "European High

Bush Cranberry, 10-12 ft. Hardy shrub single white flower in large clusters April-May, followed by scarlet fruit hanging on until spring.

2-3 ft. ea. \$1.75

"PLANT 'EM GROWING"

We have customers drop in or phone us inquiring as to what we mean by "Plant 'Em Growing". This comparatively new innovation in merchandizing plant material is proving increasingly popular, mutually advantageous and extremely practical; also offering an unprecedented shopping and planting convenience.

We simply plant or transplant ornamental plants into a pot or container filled with well balanced and carefully formulated soil. Most plants are carefully grown in the container a year or more before being offered for sale, thus developing a well established root system within the container and a shapely top. Ornamental plants well established may then be planted at your home in mid-summer while growing lushly without loss or even a set back. Thus we get "Plant 'Em Growing".

LILAC SYRINGA

This class of shrubs is of great value for Western planting; they are hardy, drought resistant, and unexcelled during their blooming season for beauty.

COMMON PURPLE LILAC. 8-10 ft.

The fine old familiar lavender-purple. 2-3 ft. ea. \$1.40; 3-4 ft. ea. \$1.80.

HIAWATHA LILAC. 8-10 ft. Remarkable blossoms in heavy clusters, deep rose-pink, forming as part of new growth escaping late spring freezing. Large luxuriant foliage.

2-3 ft. ea. \$3.00; 3-4 ft. ea. \$3.85

PERSIAN LILAC. Rothomagensis type.

8-10 ft. Flowers later than Common Lilac; color attractive lilac shade, rosy overcast. Medium size foliage and graceful habit of growth. Starts blooming young. One of the most satisfactory lilacs. 18-24 in. ea. \$1.25; 2-3 ft. ea. \$1.50; 3-4 ft. ea. \$1.85; 4-5 ft. ea. \$2.15

VILLOSA LILAC, Late Lilac. 6-8 ft.

Bushy compact grower with large attractive foliage, light lavender pink flowers. 2-3 ft. ea. \$1.40; 3-4 ft. ea. \$1.75; 4-5 ft. ea. \$2.10

FRENCH HYBRID LILACS

The Hybrid strains have added much in variety of color to the popular Lilac. Bushes similar to the Common Lilac but with decided difference and variation in color of bloom.

ALPHONSE LAVALLE. Double large deep Lilac-colored.

BELLE de NANCY, Double satiny rose-pink, beautiful.

CONGO, Single deep wine-red blossoms.

LUDWIG SPEATH, Single deep purple, large trusses.

MICHEL BUCKNER, Single pink-Lilac buds merging into blue-Lilac when open.

OBELISQUE, Large double white.

PRES. GREVY, Double beautiful pale blue.

18-24 in. ea. \$1.65; 10 for \$15.00

2-3 ft. ea. \$2.25; 10 for \$20.00

3-4 ft. ea. \$2.75; 10 for \$25.00

Hedging and Windbreak Plants

The following varieties of trees and shrubs are some of the most satisfactory for trimmed hedges, informal hedges, screens, borders, and windbreaks. We briefly point out possible recommended uses of the varieties listed below.

Trimmed hedges have plants spaced from 6 to 12 inches or more apart with 9 to 12 inches being most common. Hedging stock should be trimmed back severely ($\frac{1}{2}$ or more) when planted to induce thick growth at the bottom. For screen or borders, plants are usually spaced from 18 inches to several feet apart, depending on the variety and the effect desired.

Wind breaks consist of one or several rows. Where several rows are used, the lower growing variety is placed on the outside, or windward side. Caragana, for example, and graduating to a taller variety such as Russian Olive, and still a taller variety on the inside, such as Chinese Elm. An Evergreen row will add density particularly during winter.

Further description of the following varieties is noted in listing of large landscape sizes under trees and shrubs.

BARBERRY, Thunbergi. Low trimmed or informal hedge. Not so successful at higher altitudes or in strongly alkaline soils.

BARBERRY, Red Leaf. Same as Thunbergi, with colorful red leaves.

CARAGANA, Arborescens. Very hardy trimmed hedge 3 to 5 feet. Screens, border or windbreak.

CARAGANA, Pygmaea. Very hardy $1\frac{1}{2}$ -3 ft. trimmed or 3-4 ft. informal hedge.

CURRENT, Alpine. Dwarf, ideal for small trimmed or low informal borders. Hardy anywhere.

CHINESE ELM. The use of Chinese Elm for windbreaks has exceeded that of any other deciduous variety in the plains area. Also used for quick 4 to 7 ft. trimmed hedge. (See page 11 for larger windbreak stock.)

COTONEASTER, Acutifolia. Very hardy, dense, glossy trimmed hedges 2 to 4 feet or 5 to 7 feet screen border. Hardier than Privet for the higher exposed plains area.

PRICES OF HEDGES AND WINDBREAK PLANTS

Hedge material is smaller, lighter stock than that listed under Trees and Shrubs.

	Per 25	Per 100

SHADE and ORNAMENTAL TREES

Both beauty and comfort, by climate control, are gained by planting trees. In the following list are outstanding varieties for background, framing, for shade, ornamental specimens and screens.

The numerals following the name are the approximate height at maturity in feet. Trees are generally graded in height up to 8 to 10 ft., next larger grade being 1 1/4 to 1 1/2 inch trunk caliper with height becoming of secondary importance. 2 to 2 1/2 inch caliper tree averages about 12 to 14 ft. tall, all well branched.

ASH, Green Ash. 40 to 50 ft. One of the most popular shade tree in dry, cold climate. Makes a round headed tree with attractive green foliage.

6-8 ft. ea. \$3.75; 8-10 ft. ea. \$5.50

1 1/4-1 1/2 in. cal. \$6.90; 1 1/2-2 in. cal. \$8.75

Weeping Birch

BIRCH, Cut Leaved Weeping. 30 to 40 ft. A very graceful and attractive tree with drooping limbs and delicately cut foliage; silvery white bark. Well branched trees.

7-8 ft. ea. \$6.75; 8-9 ft. ea. \$7.75.

9-10 ft. ea. \$8.75; 10-12 ft. ea. \$9.75.

ELM Dropmore. 40-50 ft. This rugged strain of small leaved Elm imported from Harbin, Manchuria should prove to be a valuable addition to the fast growing trees for the Plains Region. Very similar to Chinese Elm, slightly slower in growth, setting foliage about two weeks later and dropping leaves about two weeks earlier thus avoiding danger of snow breakage; also more resistant to wind damage and winter injury.

8-10 ft. ea. \$4.25; 1 1/4-1 1/2 in. cal. \$5.50;

1 1/2-2 in. cal. \$8.75; 2-2 1/2 in. cal. \$12.75.

ELM Hybrid. 40-60 ft. Cross of Chinese and American Elm. Growth similar to American but rapid growth of Chinese Elm. Branches straight and strong, not subject to break in high winds. Large dark green leaves.

6-8 ft. ea. \$6.25; 8-10 ft. ea. \$8.75;

1 1/4-1 1/2 in. cal \$11.25; 1 1/2-2 in. cal \$13.75

Alternate shade tree varieties and sizes available. Inquire at Nursery.

ELM American, 40-60 ft. A noble popular American tree for street and general plantings.

6-8 ft. ea. \$2.75; 8-10 ft. ea. \$4.15.

1 1/4-1 1/2 in. cal. 10 ft. & up ea. \$5.25

1 1/2-2 in. cal. \$8.25; 2-2 1/2 in. \$12.50

ELM, CHINESE. 40 to 50 ft. Also known as Siberian Elm. An extremely rapid grower with slender, almost wiry branches carrying its dense graceful foliage over a long season.

The remarkable growth of Chinese Elm with limited moisture, together with its attractiveness have made it a favorite in the Great Plains region. Planting is not advised where moisture is excessive or at higher elevations where growing season is short.

Price Each Per 10

6-8 ft. height	\$2.50	\$22.50
----------------------	--------	---------

8-10 ft. height	3.50	32.50
-----------------------	------	-------

1 1/4-1 1/2 in. caliper	5.00	45.00
-------------------------------	------	-------

1 1/2-2 in. caliper	7.50	70.00
---------------------------	------	-------

2-2 1/2 in. caliper	9.75	
---------------------------	------	--

ELM CHINESE . Special Windbreak

Stock root pruned to secure a heavy well branched root system. Recommended for windbreaks, quick hedges, and inexpensive tree plantings.

Price Per 10 Per 100

8-10 ft. heavy	\$9.50	\$90.00
----------------------	--------	---------

6-8 ft. heavy	\$7.50	\$70.00
---------------------	--------	---------

5-6 ft. heavy	5.50	50.00
---------------------	------	-------

4-5 ft heavy	3.75	35.00
--------------------	------	-------

HACKBERRY. 40 to 50 ft. Habit of growth is very similar to American Elm. Branches are strong and wiry; tree is remarkably free from insects and disease. A very durable and sturdy shade tree.

6-8 ft. ea. \$5.00; 8-10 ft. ea. \$6.90

1 1/4-1 1/2 in. caliper trunk each \$8.75

1 1/2-2 in. cal. \$11.25; 2-2 1/2 in. cal. \$14.75

LINDEN, American. 50 ft. A pleasing tree that could well be planted more extensively in many localities. Of moderate growth, rounded to pyramidal in shape; large heart-shaped leaves; fragrant blossoms.

5-6 ft. each \$3.25; 6-8 ft. each \$5.75;

1 1/4 in. cal. & up ea. \$8.25

We have a good selection of shade Trees established in containers for summer planting. Most of these are in 5-6 ft. to 8-10 ft. grades. Inquire at Nursery for your "Plant 'em Growing" Shade and Ornamental Trees.

HONEYLOCUST, Thornless. 50 ft. We

recommend this as possibly the outstanding tree for general planting in the west central plains. Grows in most western soils; rather drouth resistant, and above average in freedom from insect pests and diseases. Has attractive pinnate or fernlike foliage and branches are not subject to snow breakage. Rate of growth moderate; does not sucker.

8-10 ft. ea. 7:75; 1¼-1½ in. cal. \$9.50

1½-2 in. cal. average 12 ft. up ea. \$11.75

2-2½ in. cal. \$14.75; 2½-3 in. cal. \$18.75

HONEYLOCUST, Thorny. Same as

above except for having thorns. Discounted one-third on above prices.

MAPLE, Schwedler, Purple or Red Leaf

Maple, 40-50 ft. One of the most attractive Maples in cultivation. As the broad leaves unfold and develop in the spring, the tree is a mass of reddish purple foliage maturing to a dark bronzy green. **8-9 ft. whips each \$5.75;**

8-10 ft. branched, each \$8.75.

MAPLE, Soft. 60 to 80 ft. The well

known rapid growing variety; foliage light colored on underside.

6-8 ft. ea. \$3.50; 8-10 ft. ea. \$5.25;

1¼-1½ in. cal. \$7.00; 1½-2 in. cal. \$9.75.

MORAINÉ LOCUST, (Pat. 836) 60 to

80 ft. A new completely thornless, podless improved Honeylocust with round head when young but tall and vase-shaped when older. **6-7 ft. whip ea. \$6.00;**

6-7 ft. branched ea. \$7.50; 8-10 ft. \$12.50.

MOUNTAIN ASH, European. 20-30 ft.

Nicely proportioned ornamental tree with rich green fern-like foliage; bears clusters of white blossoms in late spring succeeded by highly ornamental orange-red berries in fall.

6-8 ft. ea. \$4.75; 8-10 ft. ea. \$7.25.

POPLAR Lombardy. 50-60 ft. Very

rapid, narrow spire-like growth. Branches grow upright close to trunk; leaves green with broad, solid outline. Used for tall screens—formal planting.

6-8 ft. ea. \$1.50; 8-10 ft. ea. \$2.00

1¼-1½ in. cal. \$2.50; 1½-2 in. cal. \$3.00.

POPLAR, Sargenti. Cottonless Cotton-

wood. 50 to 60 ft. This is the regular Western Broadleaf Cottonwood that has been propagated from infertile trees and will not bear cotton; noted for hardiness.

8-10 ft. ea. \$3.95; 1¼-1½ in. cal. \$5.25;

1½-2 in. cal. \$7.25; 2-2½ in. cal. \$9.75.

RUSSIAN OLIVE. 20 to 25 ft. One of

the hardier trees. Has narrow silvery foliage and stems; small very fragrant blossoms. Fine for specimens, screens and hedges.

5-6 ft. ea. \$2.75; 6-8 ft. ea. \$4.50;

1¼-1½ in. cal. \$7.50; 1½-2 in. cal. \$9.75.

WILLOW, Niobe Weeping. 30-50 ft. Has

very attractive golden bark and long, pendulous branches; beautiful in summer and of striking winter appearance.

5-6 ft. ea. \$2.25; 6-8 ft. ea. \$3.25

FLOWERING CRABS

Flowering Crabs are becoming very popular as medium sized ornamental Trees. Particularly desirable either as specimen trees or group planting in landscaping our modern homes. New introductions adding pyramidal growth types and richer color in foliage and bloom increases their potential usefulness. A row of these uprights, as a screen or background, in full bloom almost defies description.

We specialize in growing and offering the largest selection of Flowering Crabs in the Plains. Aldenham, Baccata Pyramidalis, Dauphin Rosy Bloom, Eleye, Jay Darling, Purple Flowering and Red Silver are available in addition to varieties described. Inquire at nursery for description, prices.

✓ **ALMEY.** 15-20 ft. Large blossom of glistening red petals, white marking at base giving the effect of a five pointed star. Scarlet fruit retaining till spring. Resistant to fire blight.

4-5 ft. ea. \$4.00; 5-6 ft. ea. \$4.50

6-8 ft. ea. \$5.75.

BECHTELS. 12-15 ft. A dwarf crab bearing many rose-like large double pink flowers in May. A standard of excellence in flowering crabs.

2-3 ft. ea. \$1.50; 5-6 ft. ea. \$4.50.

✓ **DOLGO.** 20 ft. A first rate hardy ornamental as well as bearing very useful fruit for jellies. White flowers followed by highly colored small crimson fruit. **4-5 ft. ea. \$2.25; 5-6 ft. ea. \$2.75.**

✓ **HOPA (Red Flowering Crab).** 20-25 ft.

Striking rosy-red flowers followed by bright red fruit; foliage has soft bronzy tinge. A choice hardy variety.

5-6 ft. ea. \$3.25; 6-8 ft. ea. \$4.00;

8-10 ft. ea. \$5.25; 1¼-1½ in. cal. \$6.75;

1½-1¾ in. cal. \$8.50; 1¾-2 in. \$10.75.

M. R. 454. 15-20 ft. Upright in growth, purplish maroon foliage, buds are a deep blood-red opening late to rosy flowers that fade to a clear pink followed by decorative cherry-red miniature apples.

4-5 ft. ea. \$3.75; 5-6 ft. ea. \$4.50.

STRATHMORE. 15-20 ft. A narrow

upright Tree, with flowers similar to those of "Hopa" but darker and less fading. Fine foliage remains reddish all summer turning red to scarlet in fall.

4-5 ft. ea. \$3.75; 1¼-1½ in. cal. \$7.50.

WABISKA. 20-25 ft. Semi upright in

habit, foliage waxey green turning red in autumn, purplish-red semi double flowers, flesh of fruit tinged red, but few fruit.

5-6 ft. ea. \$3.25; 1½-1¾ in. cal. \$8.00.

EVERGREENS

PLANT EVERGREENS FOR SUMMER BEAUTY AND WINTER COLOR

Most important of all is the warm, green cheerfulness of varied foliage textures in the winter landscape when other ornamentals are without foliage or flowers. Summer and winter, Evergreens give an air of friendliness and distinction to any planting.

Careful skill is devoted to digging our Evergreens with an ample ball of earth to give assurance of continued successful growth.

Upright Junipers

These are the pyramidal Evergreens very frequently planted close to buildings, along with low evergreens and shrubs. The outline and height can be influenced by shearing.

The following distinct and beautiful named varieties have each originated from an outstanding specimen parent tree selected from among thousands and grafted from the original parent stock. These grafted trees then have characteristics identical with the parent tree and with each other. Thus it is possible to have exactly matched trees in growth habit and appearance either in pairs or any multiple. All varieties below are of Juniper Scopulorum species except J. Cannart which is J. Virginiana strain. The illustration of Moffetti Juniper is typical of J. Scopulorum growth habit.

Scopulorum Juniper

Grafted Junipers

CANNART JUNIPER. Foliage distinctive rich, deep green and usually displays numerous silvery-blue berries when well established. Size 1, 2, 3, 4.

DEWDROP Scopulorum Juniper. Named Dewdrop due to its natural drop shaped growth. Color green to greenish-silver. Size 2, 3.

MOFFETTI Scopulorum Juniper. One of the best. Upright pyramidal habit of growth; compact and shapely with very little trimming. Attractive greenish silver color. Size 1, 2, 3, 4.

PATHFINDER Scopulorum Juniper. A bluish silver with very pyramidal habit of growth and somewhat flat foliage. Size 1, 2.

SUTHERLAND Scopulorum Juniper. Has a natural full-bodied habit of growth, compact with very little trimming. Medium to dark green in color. Size 1, 2, 3, 4.

GRAFTED JUNIPERS		Price Each
Size 1	4-4½ ft.	\$17.50
Size 2	3½-4 ft.	15.00
Size 3	3-3½ ft.	13.00
Size 4	2½-3 ft.	11.00

SCOPULORUM JUNIPER or Colorado

Silver Juniper. This is the hardy western upright variety. Growth conical and densely branched; foliage of pleasing and varying texture and color. Being seedlings, there is a variation in color from green to greenish-silver from tree to tree making it very difficult to match pairs. Seedlings are just as desirable and useful as the Grafted varieties if matched growth characteristics are not an important factor. In ordering, give preference in color; Green — Greenish blue — Greenish silver.

5-5½ ft. each	\$18.00
4½-5 ft. each	16.25
4-4½ ft. each	14.50
3½-4 ft. each	12.75
3-3½ ft. each	11.00
2½-3 ft. each	9.00

UPRIGHT HETZLI JUNIPER. A useful version of the very popular Pfitzer Juniper trained upright. Its irregular growth is desirable where a somewhat broader and less formal evergreen of limited height is needed.

3-3½ ft. each \$13.75

Alternate Upright Juniper varieties and sizes available. Inquire at Nursery.

Baby Evergreens

These are the same varieties as described, three times transplanted, well-rooted and branched. If immediate effect is not too important they may be quite useful in foundation planting, informal Evergreen hedges and borders or groups. All established in containers. Add 25c each for crating on all express shipments.

HETZII JUNIPER. Nice plants 12 inches or more spread. Fine for starting hedge.

MAHONIA. Oregon grape. 6 to 10 inch plants.

PONDEROSA PINE. Average 18 in. tall, branched and nicely started.

PFITZER JUNIPER. Nice plants 12" or more spread.

SABINA JUNIPER. Average 12 inch spread, densely branched.

TAMARISCIFOLIA. Well shaped plants about 12" spread.

Priced alike

Each	Per 3	Per 10	Per 25
\$2.25	\$6.50	\$21.50	\$50.00

PONDEROSA PINE. Pictured are 3 years old, grown for one year in 3x3x6" bands to assure transplanting survival. An economical way to start a beautiful evergreen windbreak screen or hedge.

Priced per Each bed run in lots of:

 50c 40c 35c

MAHONIA AQUIFOLIUM. Oregon grape 3-5 ft. A broad-leaved evergreen with holly-like foliage of bright glossy green leaves, clusters of golden yellow blooms in spring. Plant where protected from winter winds and sun.

12-15 in. tall \$6.00; 15-18 in tall \$7.00; 18-24 in tall \$8.00; 2-2½ ft. tall \$9.50.

For additional varieties of low growing Evergreens and alternate sizes available, inquire at the Nursery.

Low Growing Junipers

For Foundations and Border Planting

Junipers are quite an asset to the winter landscape in the Plains Region where most shrubs are without foliage for approximately six months. In addition to their incomparable value in foundation plantings they make beautiful low informal and sheared evergreen hedges.

Low growing evergreens are measured by the average diameter of their spread and may be furnished in container-established stock or balled and burlaped (B & B) from field.

HETZII Juniper. Very similar to the popular Pfitzer Juniper with a little taller growth habit and distinctive Silver-blue in color.

18-24 in. ea. \$7.50; 2-2½ ft. ea. \$9.00; 2½-3 ft. ea. \$11.25.

PFITZER JUNIPER. A low spreading Juniper, one of the best; foliage attractive blue-green or soft mossy appearance. Note picture page 14.

18-24 in. ea. \$7.50; 2-2½ ft. ea. \$9.00; 2½-3 ft. ea. \$11.25; 3-3½ ft. ea. \$13.50.

SABINA JUNIPER. Low growing type with numerous upright fan - shaped branches, with tufted dark green foliage.

18-24 in. ea. \$7.25; 2-2½ ft. ea. \$8.75.

TAMARISCIFOLIA JUNIPER. Dwarf low growing Juniper that ranks as one of the neatest, most attractive in cultivation. A green color that is softened by a blue tone in a densely patterned growth. Little change in color, summer to winter. Also has possibilities for "planter box" planting. Note picture page 14.

15-18 in. ea. \$7.50; 18-24 in. ea. \$8.50; 2-2½ ft. ea. \$10.00.

"PLANT 'EM GROWING"

Complete foundation plantings may be installed on the hottest summer day using our container established Evergreens and Shrubs, with very little danger of losing a plant; thus, making it no longer necessary to wait from June until the next spring to plant landscape improvements.

We are continually expanding our offering of container established Evergreens to include alternate varieties and sizes in addition to these listed in our catalog.

Pines

Austrian Pine

AUSTRIAN PINE. Pine tree of standard growth habit, carrying better shape, density and color than average taller growing varieties. Long rich green needles. Inquire at Nursery regarding alternate available sizes.
2½-3 ft. ea. \$10.50; 3-3½ ft. ea. \$12.75.

PONDEROSA. (Bull or Western Yellow Pine.) A native pine with long glaucous needles. Develops into beautiful pyramidal tree. Stands almost unlimited drought. Grows about 12 inches a year. Ultimate height 60-60 ft. Growth and appearance very similar to the Austrian Pine illustrated above. Inquire at Nursery regarding alternate sizes also see Baby Evergreens. Priced below.

PINON PINE. A slow-growing choice variety. Low round-headed tree, branching from ground. Short foliage of rich warm green, produces delicious edible nuts. Make beautiful specimen trees or ideal tall informal evergreen screens.

Prices on Ponderosa & Pinon Pine:
2-2½ ft. \$7.75 2½-3 ft. \$9.50
3-3½ ft. \$11.25 3½-4 ft. \$13.25
4-4½ ft. \$15.00 4½-5 ft. \$17.00
 Larger sizes priced on selection.

LOW-GROWING PINE

MUGHO PINE. The popular low-growing compact pine that fits in so well in foundation plantings, as specimens or in groups.

Size given in spread:

15-18 in. \$9.00; 18-24 in. \$11.00;
 2-2½ ft. \$14.00; 3-3½ ft. \$20.00

Spruce

COLORADO BLUE SPRUCE. This is one of the choicest and most beautiful of all evergreens with its symmetrical pyramidal form and color. It is exceptionally well adjusted for wide range of planting and is one of the hardiest.

There is a natural color variation of trees of this species even in seedlings from the same parent tree, and these we classify as Select Blue, Average Blue, and Green color types. Aside from color there is no difference in groups, the contrast between the blues and greens make pleasing combinations. Rate of growth 6 to 12 inches or more per year.

SELECT BLUE TYPE

2-2½ ft. ea. \$13.00; 2½-3 ft. \$16.25
 3-3½ ft. 19.50; 3½-4 ft. 22.75
 4-4½ ft. 26.00; 4½-5 ft. 29.25
 5-5½ ft. 32.50; 5½-6 ft. 33.75

AVERAGE BLUE TYPE

2 to 2½ ft. ea. \$10.00; 2½ to 3 ft. \$12.50
 3 to 3½ ft. \$15.00; 3½ to 4 ft. \$17.50
 4 to 4½ ft. \$20.00; 4½ to 5 ft. \$22.50
 5 to 5½ ft. \$25.00; 5½ to 6 ft. \$27.50

GREEN TYPE

2-2½ ft. ea. \$ 8.00; 2½-3 ft. \$10.00
 3-3½ ft. 12.00; 3½-4 ft. 14.00
 4-4½ ft. 16.00; 4½-5 ft. 18.00

Larger spruce or exceptions to average color or conformation priced according to value upon application or by personal selection. (Special crating if required charged at cost).

Alternate size available in some groups. Inquire at Nursery.

Field Photograph

Climbing Vines

CLEMATIS. One of the most beautiful 10 to 12 ft. vines grown. Very popular due to their beautiful large purple, red, blue, or white flowers in July.

1 yr. pot grown \$1.35 ea. Ppd.

2 yr. field grown \$2.25 ea. Ppd.

CLEMATIS JACKMANNI. Most popular and vigorous Clematis opening flowers from 4 to 6 inches across: rich velvety purple.

CLEMATIS ANDRE. Flowers large, bright velvety red.

CLEMATIS HENRYI. Flowers large creamy white.

CLEMATIS RAMONA. Flowers large, light blue.

ENGLEMAN IVY. 30 to 40 ft. Neat, hardy self-climber on brick or stone walls; brilliant autumn colors. Rapid growing, very hardy and dependable.

2 yr. No. 1 plants — Post Paid

	Each	Per 3
ENGLEMAN IVY	\$.95	\$2.50
GRAPE, Beta60	1.65
HONEYSUCKLE, 'Gold Flame'	1.20	3.50
HONEYSUCKLE, Scarlet Trumpet95	2.65
SILVER LACE VINE	1.20	3.50

BETA Grape. The most dependable hardy grape for covering arbors and fences.

HONEYSUCKLE Gold Flame. 15-20 ft. Blooms all summer. The showy flowers borne in clusters are red outside and a golden yellow inside. Very fragrant.

HONEYSUCKLE, Scarlet Trumpet. 15-20 ft. Desirable vine with red tubular flowers over rather long period during summer. Has rich dark foliage remaining late in fall.

SILVER LACE VINE. 20 to 25 ft. Very rapid growing vine with fresh green foliage decorated with clouds of fragrant, foamy white flowers from July on.

CLIMBING ROSES are an ever popular subject for trellises. Our climbing roses are listed under "Climbing Roses".

CONTAINER-ESTABLISHED MATERIAL

This method of handling Nursery stock is rapidly becoming popular in the Plains Region by virtue of the very successful results obtained by home gardeners. Not only offering the home owner an opportunity to make successful planting throughout the summer, container - established materials also provide personal selection of incidental items or the selection of a complete landscape planting from stock growing in full leaf or bloom. Successful planting experiences of the past seasons has prompted us to extend our offering to include most of the varieties of shrubs, Evergreens, Vines, Roses, Mums, Perennials, and a few fruit and shade trees described in this catalog, as long as contemplated requirements last. Available June thru October. 'Plant 'Em Growing'

Soil used in establishing our stock is specially prepared and carefully formulated to provide ample humus and fertility to insure healthy growth. With simple planting requirements, as illustrated below, and reasonable growing conditions, successful continued growth without wilt or loss of bloom may be expected.

FIBER CONTAINERS ARE EASILY REMOVED BY SPLITTING SIDES WITH POCKET KNIFE. METAL CONTAINERS ARE SPLIT DOWN TWO SIDES BEFORE LEAVING NURSERY.

METAL CONTAINERS ARE REMOVED BY LOOSENING SIDES & BENDING AWAY FROM ROOT BALL. REMOVE PLANT BY LIFTING BALL WITHOUT BREAKING UP SOIL.

1. DIG & TEST HOLE SIZE & DEPTH BEFORE REMOVING CONTAINER. BE SURE GRAFT ON ROSES IS LOCATED ABOUT 2" BELOW SURFACE

2. REMOVE CONTAINER CAREFULLY & SET PLANT IN HOLE.

3. FILL AROUND BALL WITH GOOD SOIL GENTLY & FIRMLY TACKED.

4. LEAVE SOME SPACE TO HOLD WATER & SOAK THOROUGHLY.

5. AFTER WATER SEEPS AWAY, FINISH FILLING WITH SOIL.

CAUTION: DO NOT BREAK OR CRUMBLE SOIL ROOT BALL!

ROSES

Roses in all their beauty and fragrance can be enjoyed in almost any garden. For best success with Everblooming roses, good fertile soil, several hours daily sunshine, and good thrifty planting stock is required. Where soil is poor, it should be replaced with good top soil to a depth of 18 to 24 inches for the rose bed. A six-inch mound of soil or leaves over the crown of the plant is a good means of winter protection. In many localities, climbing roses should be laid down for winter and entirely covered. Hardy Shrub Roses need no protection and are not exacting as to soil.

Our list of roses represents a very careful selection in all colors from a great number of varieties. You will find a number of choice new creations of recent years as well as some of the old favorites that cannot be replaced because of their lasting merits.

Everblooming Roses

Roses Post Paid at EACH rate only

Finest Western 2 year Top Size Field Grown, Dormant Bushes. Priced each \$1.50; 10 for \$13.50.

PINK SHADES

EDITOR McFARLAND. Fine shapely buds opening to double balanced flower; color is solid deep brilliant pink; blossoms freely.

PICTURE. A picture both in form and color. Beautiful buds open into medium size pink blossoms with warm salmon undertone.

PINK DAWN. Deep rose pink lightly toned with salmon-rose. Perfectly formed buds and bloom.

PINK RADIANCE. This is a fine all-around garden rose of brilliant rose-pink; vigorous and prolific; consistent performer.

THE DOCTOR. Large beautiful buds expand to enormous blooms of exquisite silvery pink, with intense rose fragrance.

YELLOW SHADES

ECLIPSE. Bud long-pointed deep gold. Flowers yellow. Foliage leathery. Vigorous.

GOLDEN RAPTURE. Long lasting well-shaped buds and double blooms of rich yellow on long stems.

JOANNA HILL. The buds are large, long pointed and open to large full, semi-double attractive flowers of soft yellow with darker center.

McGREDY'S YELLOW. Bright buttercup yellow flowers of good form and substance. Glossy bronzy leaves, reddish stems.

MRS. PIERRE S. DuPONT. Medium sized long-pointed bud of a reddish gold opening to semi-double cupped lasting flower of deep golden yellow.

SOEUR THERESE. Long pointed buds of chrome-yellow, heavily marked with carmine; open flower of rich daffodil-yellow. Sweet briar fragrance.

WHITE SHADES

K. A. VICTORIA. A popular fragrant white. Bears many large creamy white, perfect blooms.

McGREDY'S IVORY. Fine creamy white fragrant rose that has deep petals of good substance. Pointed buds open to large double blooms.

MME. JULES BOUCHE. Not a mammoth rose, but ideal in form of bud and flowers. A slight flush of pink shows in center of opening buds, the flower maturing to pure white. Fragrant.

SNOWBIRD. Exquisite, small to medium, long, flaring white buds open into showy, many petaled high-center blooms.

BICOLOR and BLENDING

AUTUMN. Profuse bloomer with long, strong stems, very double, well shaped blossoms of autumn colors; burnt-orange and yellow, splashed red.

CONDESA de SASTAGO. A new variety with rare attractive color. Bears quantities of double flowers; petals are distinctly two-toned, deep coppery pink on inside and golden yellow outside. Vigorous, bushy.

COUNTESS VANDAL. Very long and graceful buds opening slowly to beautiful high centered flowers to coppery bronze and pink suffused with gold and salmon.

DUQUESA de PENARANDA. A beautiful blend of apricot orange and dark pink, opening to splendid blooms of coppery apricot.

EDITH NELLIE PERKINS. Buds long and pointed, outside of petals cream and blush shaded with orange, inside salmon pink, golden orange base.

PRES. HERBERT HOOVER. Fragrant flowers. Very charming combination of cerise-pink, flame, scarlet and yellow with pink shade dominant.

TALISMAN. Brilliant red and gold buds, opening to well shaped blooms of glowing yellow stained copper-red and orange-rose on inside petals.

CHRISTOPHER STONE. Brilliant sparkling scarlet crimson. Shapely long pointed buds open into large attractive flowers with true old damask rose fragrance.

CRIMSON GLORY. Consistently tops among red roses. Large urn-shaped buds open to fragrant flowers of intense, deep vivid crimson shaded with deeper red, and mellowed with soft velvety nap.

E. G. HILL. One of the finest red roses. Long buds, high centered fully double flowers; dazzling scarlet maturing to deeper pure red.

ETOILE de HOLLAND. Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when open; fragrant.

POINSETTIA. One of the most brilliant shades in red roses; referred to as Poinsettia-scarlet in color. Has long buds, nicely petaled.

RED RADIANCE. This is the bright rosy-red form of Pink Radiance. Very popular.

ROUGE MALLERIN. Exceptionally fine deep red rose of the most intense coloring with the texture and luster of velvet. Holds its color exceptionally well. Fragrant.

TEXAS CENTENNIAL. (Hoover sport; vigorous. Bright vermillion red with light tone of gold at base. Petals lighter red at center, gradually toning to deep rich pink as bloom ages.

WILL ROGERS. Very dark velvety-crimson maroon; double, free bloomer with dark green foliage.

PEACE COLLECTION

The collection will include one PEACE rose, which everyone should grow, and one each of the Red, Yellow, Pink and Bicolor of OUR selection from the fine stock and varieties listed under Everblooming Roses.

Post paid. Order early.

Patented Everblooming Roses

All varieties listed below are the Hybrid Tea everblooming bush type. Each is offered here for its individual distinction; the majority of these have received American Rose Society Awards (AARS)

Finest Western 2 year Top Size Field Grown. Post Paid Each Rate only.

CAPISTRANO. (Pat.) AARS. Rich shade of deep glowing rose pink both in bud and open flower with practically no fading through life of flower. Large buds and blooms and strong stems. Rich heavy lasting fragrance.
Each \$2.00; 3 or more \$1.80 ea.

CHARLOTTE ARMSTRONG. (Pat.) AARS. Long slender blood-red to cerise flowers that attract attention in any rose planting.
Each \$2.25; 3 or more \$2.00 ea.

CHRYSLER IMPERIAL. (Pat.) 1953 AARS Winner. Long buds, large high-centered flowers of crimson red. Excellent plants and foliage.
Each \$2.50; 3 or more \$2.25 ea.

FORTY-NINER. (Pat.) AARS. Brilliant hued bicolor; colors contrast brilliantly, yet combine beautifully. Inside of petals are vivid Orient red, while outside is Chrome-yellow changing to softer yellow. Long beautiful buds.
Each \$2.25; 3 or more \$2.00 ea.

GOLDEN MASTERPIECE. (Pat.) Long pointed buds, very large fragrant golden-yellow blossoms. Foliage mildew resistant. **Each \$2.75; 3 or more \$2.50 ea.**

HEARTS DESIRE (Pat.) Long unfurling petals of pure even shade of luminous red, holding color and shape remarkably well. Exceptionally fragrant; plants vigorous and prolific.
Each \$1.75; 3 or more \$1.60 ea.

HELEN TRAUBEL. (Pat. 1028) 1952 AARS Winner. The color varies somewhat with the weather from a light sparkling pink to luminous apricot. Its unusual large, long slender buds are magnificent, opening into 4 to 5 inch pleasingly fragrant blossom. Vigorous, robust plants, attractive foliage.
Each \$2.50; 3 or more \$2.25 ea.

LOWELL THOMAS (Pat.) AARS. Large long pointed buds open to large double high centered lasting blooms of clear Canary yellow.
Each \$2.25; 3 or more \$2.00 ea.

MIRANDY (Pat.) Strong plant producing deep maroon red blooms with deeper shading; long pointed oval buds. Beautiful in form and long lasting.
Each \$2.25; 3 or more \$2.00 ea.

MOJAVE (Pat.) 1954 AARS Winner. Named for California's famous desert, being glowing orange shot with flame-like tones of scarlet, typical of desert sunset. The many long-stemmed, beautiful tapering buds open to big pleasantly fragrant flowers on vigorous plant. **Each \$2.75; 3 or more \$2.50 ea.**

NEW YORKER. (Pat.) Buds slowly open into very large flowers of lasting brilliant red shade composed of scarlet with rose red undertones overlaid with rich velvety sheen.
Each \$2.25; 3 or more \$2.00 ea.

PEACE. (Pat.) A masterpiece, winning the highest score ever given a new rose in the 1946 All American Rose Award! Greatest charm is in changing panorama of color. Large oval buds are rich gold, edged cerise; as outer petals unfold, the gold changes to canary to pale gold and iridescent cream; cerise edge deepens and becomes broader as flower slowly opens to glorious 5-inch blooms. Everyone should grow this. **Each \$2.50; 3 or more \$2.20 ea.**

SHOW GIRL (Pat.) Rich deep Phlox-pink blooms on freely branching, upright plants. Beautiful long pink buds
Each \$2.25; 3 or more \$2.00 ea.

SUTTERS GOLD. (Pat.) AARS 1950. Beautiful long pointed yellow buds, richly shaded with orange and red. Rich tea fragrance not found in any other yellow. **Each \$2.25; 3 or more \$2.00 ea.**

TIFFANY 1955 AARS Winner (Pat.) Vigorous upright plant, dark green leaves, producing long stem buds and perfect blooms of a clear pink with a salmon undertone. Very fragrant.
Each \$2.50; 3 or more \$2.25 ea.

Potted Roses

Experience the past few years, by us and other Nurseries, has proven practical and desirable the use of Roses established in containers to supplement the April and early May planting season of dormant bushes. As our patrons become acquainted with the ease of planting Potted Roses and the convenience this innovation in merchandizing affords; we are yearly increasing our offering. We will have numerous alternate varieties in addition to catalog listing for your selection while in bloom from June throughout the summer and fall. "Plant 'Em Growing".

Polyantha and Floribunda Roses

Floradora

STANDARD & OLDER PATENT

Finest Western 2 yr. No. 1 Each \$1.50
10 for \$13.50. Ppd. Each rate only.

CRIMSON ROSETTE. (Pat.) Vigorous, dwarf dark crimson, slightly fragrant. Blooms profusely. Foliage leathery, dark.

DAGMAR SPAETH. Large trusses of white flowers produced freely all summer on medium height bushes.

ELSE POULSEN. Flowers medium size, semi-double lasting, bright rose pink. Continuous blooming from summer to late fall on erect thrifty plants.

EUTIN. Even strangers will ask you its name. Very striking double rich red flowers produced with Floribunda abundance on vigorous bush.

FLORADORA. AARS. Fascinating Cinnabar color shaded scarlet and geranium red. Double blossoms; vigorous bushes.

IMPROVED LAFAYETTE. Medium sized deep glowing red flowers suffused vivid crimson. Blooms profusely, flowers of rose crimson.

POULSEN'S BEDDER. Outstanding new pink. Big lightly ruffled, clear, blooms; profuse. Strong healthy, upright plant.

WORLD'S FAIR (Pat.) AARS. A truly great Floribunda, large clusters of velvety deep red, shading almost to black.

These will outbloom anything in the rose family all summer long. Very desirable for landscape effect in solid beds, borders or colorful highlights in the foundation planting. Their bushy thrifty growth averages about 24 inches. Profuse and colorful.

PATENTED FLORIBUNDAS

Finest Western 2 year Top Size Field Grown. Dormant Bushes. Priced each.

BABY BLAZE (Pat.) Velvety cherry-red with white eye. Flowers in large clusters; old spice fragrance. Each \$2.00; 3 or more \$1.80 ea.

CIRCUS. (Pat.) AARS. for 1956. Perfect buds of bright yellow and orange. High centered flowers display ever-changing tones of yellow buff, pink and bright red. Each \$2.50; 3 or more \$2.25 ea.

FASHION (Pat.) AARS for 1950. Brilliant luminous coral flowers. All season, blooms single and in clusters. Each \$2.00; 3 or more \$1.80 ea.

GOLDILOCKS (Pat.) Profuse clusters of golden-yellow double blooms on compact plants. A delightful addition to the yellow Floribundas. Each \$1.75; 3 or more \$1.60 ea.

INDEPENDENCE (Pat.) Very double, large blossoms of brilliant orange-scarlet; better described as "fire-cracker" red. Each \$1.75; 3 or more \$1.60 ea.

JIMINY CRICKET (1955 AARS Winner) A sparkling new color in Floribundas. A bright apricot-orange. Profuse bloomer on a vigorous, glossy green plant. Each \$2.00; 3 or more \$1.80 ea.

MA PERKINS (Pat.) 1953 AARS Winner. A sparkling new color with rich unusual fragrance. Each delightfully shaped bud deep salmon pink with dash of gold flush of red opens into 2½-3 in. sparkling double, soft coral pink flowers. Each \$2.00; 3 or more \$1.80 ea.

MASQUERADE (Pat.) A rare novelty. A cluster of 10-25 buds show blooms of yellow, red pink, lemon and sometimes orange. Each \$2.00; 3 or more \$1.80 ea.

PINOCCHIO. (Pat.) A thrifty plant producing an abundance of pointed buds of salmon-flushed gold opening to miniature hybrid-tea like roses of soft clear pink and in clusters. Each \$1.75; 3 or more \$1.60 ea.

RED PINOCCHIO (Pat.) A sport of Pinocchio with darker rich carmine color. Each \$1.75; 3 or more \$1.60 ea.

SPARTON. (Pat.) Slowly opening buds of burnt-orange become orange-red and then reddish coral, sweet fragrance. Hardy and vigorous.
Each \$2.75; 3 or more \$2.50 ea.

TEXAN (Pat.) 1957 Introduction. Firey red hybrid-tea type blossoms; on a vigorous bush with leathery dark green foliage. Cross between Peace and Improved Laffayette.
Each \$2.50; 3 or more \$2.25 ea.

VOGUE (Pat.) 1952 AARS Winner. A wonderful new floribunda. It is intense cherry coral with well formed 3-4 inch flowers of Hybrid-tea form. The very dark, oval buds open slowly to a delightfully fragrant bloom carried in sprays on a dark foliage.
Each \$2.00; 3 or more \$1.80 ea.

WHITE BOUQUET (Pat.) 1957 AARS

Winner. Sparkling white gardenia-like blooms with a sweet spicy fragrance. Contrasting lustrous dark green foliage.
Each \$2.50; 3 or more \$2.25 ea.

GRANDIFLORA ROSES

A brand new rose class featuring high-center form and long stems of Hybrid Teas and borne in clusters on a taller, more robust plant.

BUCCANEER. (Pat.) A brilliant unfading new yellow with particularly lovely, long slender and tapering buds
Each \$2.50; 3 or more \$2.25 ea.

CARROUSEL (Pat.) Semi double, fragrant, dark red. Profuse bloom.
Each \$2.00; 3 or more \$1.80 ea.

QUEEN ELIZABETH (Pat.) AARS Winner 1955. A delicate clear pink in both bud and high-center open blooms borne in clusters and on single stems.
Each \$2.50; 3 or more \$2.25 ea.

Shrub Roses

AUSTRIAN COPPER. The brilliant rose loaded with single bright orange-red blossoms with yellow underside. Very hardy. 5-6 ft. Two year No. 1 ea. \$1.50.

GROOTENDORST SUPREME. Deep crimson-red, long lasting flowers in clusters.
Two year No. 1 size. each \$1.35.

HARRISON'S YELLOW. The charming old favorite hardy 5-6 ft. bush rose bearing a profusion of semi-double bright yellow flowers about Decoration Day.
Two year No. 1 ea. \$1.50

RED LEAF ROSE, Rosa Rubifolia, 6-8 ft. Very hardy attractive reddish-violet tinged foliage, starry bright pink blossoms in June followed with showy orange-red berries.
2-3 ft. ea. \$1.35; 3-4 ft. ea. \$1.75

Climbing Roses

Give a lift to your garden, adding variety with their height. Space about six feet apart along fences and arbors. Trim out only the old worn out wood after they have finished blooming.

AMERICAN BEAUTY CLIMBER. Large double flowers of rose crimson.
Each \$1.35.

BLAZE. Popular climber with double scarlet crimson blooms similar to Paul's Scarlet; however, some bloom is produced on two-year wood after the main June crop. Each \$1.50.

CRIMSON RAMBLER. Double, bright crimson, large pyramidal clusters. Foliage large, light, leathery. Vigorous grower. Each \$1.35.

DR. J. H. NICHOLAS (Pat.) Everblooming climber or pillar type that has large fully double deep rose pink 5-6 inch wide flowers on long stems. Foliage rich dark green. Judicious fertilizing will encourage progressive growth with the succession of bloom.
Each \$2.00; 3 or more \$1.75 ea.

GOLDEN CLIMBER. Long gracefully shaped golden yellow buds open into rich yellow Tea-like blooms in June-July on long stems. Each \$1.50.

GOLDEN SHOWERS. (Pat.) 1957

AARS Winner. Climber-pillar, almost thornless daffodil yellow with long pointed buds, fragrant, 4-5 in., profuse bloom. Vigorous plant.
Each \$3.00; 3 or more \$2.65 ea.

HIGH NOON (Pat.) The intense shade of clear shining yellow displayed in medium sized well shaped buds on long stems with glossy light green foliage. High Noon produces a big crop in Spring, continuing throughout the entire growing season.
Each \$2.50; 3 or more \$2.25 ea.

NEW DAWN. Everblooming. An exceptional climbing rose that produces a fine display of double flesh pink blossoms on long stem through June, and then as the summer goes along, new buds and flowers continue until frost.
Each \$1.50.

PAUL'S SCARLET. For brilliant color this rose is unsurpassed. Produces clusters of semi-double vivid dazzling red blossoms. Each \$1.35.

HARDY GARDEN CHRYSANTHEMUMS

AN ADDED MONTH OF FLOWERS NOW MAKES INDIAN
SUMMER A MOST COLORFUL SEASON OF
CHRYSANTHEMUMS

Gold, Manantico; from 5,500 to 6,500 ft. — most any variety blooming in September or earlier; less than 5,500 ft. — all varieties in this list.

Height of plants when in bloom is stated after each variety. This is for comparison and will vary depending on location, soil, watering. Plants usually grow a little taller the second year. Chrysanthemum plants usually take until May 1st to establish sufficient growth before transplanting. **Priced Postpaid.**

CUSHION TYPE MUMS

Make low plants, broader than tall, covered with solid mass of flowers in full bloom. Pink Cushion and its relatives are also advertised as "Azalea-mums."

ARIKARA (12-14 in.) U.S.D.A. Reddish-bronze with 2½-3 in. semi double flowers borne in profusion. Early Sept. Each 50c; 3 for \$1.25.

BRONZE CUSHION. A "cushion of flowers in masses from August into Oct;" broad dwarf mounds 12 to 16 inches high completely covered with masses of deep bronze turning to coppery yellow. Each 50c; 3 for \$1.25.

CODY (8-10 in.) A very dwarf large flowering lavender with a cream center. Less than 12 in. high. Late Aug. on. Each 50c; 3 for \$1.25.

CRIMSON QUEEN (10-14 in.) Double red 2 in. blooms ageing bronze red on dwarf mound-like plant August. Each 50c; 3 for \$1.25.

EARLY GOLD (15 in.) Very early. Bright golden yellow pompon with contrasting dark green foliage. Much more colorful than Yellow Cushion. Late August. Each 60c; 3 for \$1.50.

FLICKA (15 in.) U.S.D.A. Mid-Sept. Flowers are an interesting bronze with rose tints; shape pompon-like, almost entirely double. Each 50c; 3 for \$1.25.

GOLDEN MOUND. (16 in.) A mound of golden yellow 1½ to 2 in. fully double flowers. September. Each 50c; 3 for \$1.25.

HIDATSA (12-14 in.) U.S.D.A. Really red, double compact 1½ inch blossoms on a dwarf cushion plant. Full bloom in Sept. Each 50c; 3 for \$1.25.

NANOOK (14 in.) Compact mound completely smothered by large double white flowers with cream center. Early Sept. Each 60c; 3 for \$1.50.

PINK CUSHION, Amelia (12-16 in.) Same as "Bronze Cushion" but pink flowers. Each 50c; 3 for \$1.25.

POWDER PUFF (12-15 in.) A new white cushion with 2 inch double open faced blooms produced in typical cushion-type. Late Sept. Each 50c; 3 for \$1.25.

ROZA (1952 U.S.D.A. Introduction) (14-16 in.) Standard cushion type. Semidouble 1¾ in. flowers of intriguing shade between rose and lavender. Late August. A much better plant and color than Pink Cushion. Each 50c; 3 for \$1.25.

SANDRA (12-15 in.) Free flowering cushion type. Striking crimson with rust suffusion. Each 50c; 3 for \$1.25.

WHITE GULL. Baby Pompon of compact low growth producing quantities of small rounded one-inch white button mums. August. Each 50c; 3 for \$1.25.

YELLOW CUSHION. Same type and habit as "Bronze Cushion," but yellow flowers. Each 50c; 3 for \$1.25.

SEMI-DWARF AND LARGER CUSHION

APACHE. (18 in.) Large, shaggy, golden bronze 3 to 4 inch double blooms with curled petals. Late September. Each 60c; 3 for \$1.50.

MRS. E. PATTIE (20 in.) Interesting shade of terra-cotta red with gold reverse; rather broad incurving petals. Attains about 3½ in. size without disbudding. Late Sept. Each 60c; 3 for \$1.50.

REVELLER (22 in.) Striking 3 in. blossoms of glowing orange-red with gold center. Late Sept. Each 50c; 3 for \$1.25.

"PLANT 'EM GROWING"

We will have an almost complete selection of our Chrysanthemums established in containers on display at the Nursery during the summer and fall. Selection may be made during the summer from illustrations at the office or from the plants in bud or bloom in fall. (See page 10.)

PERENNIALS

ONCE PLANTED WILL CONTINUE TO BLOOM YEAR AFTER YEAR

Most Perennials require an open, sunny situation to thrive and show at their best. Soil should be well drained rich garden loam, and enriched each year with an application of well-rotted manure used as a mulch in the fall. Apply the mulch after the ground is frozen.

Prices of Perennials, unless otherwise indicated 50c each; 3 alike for \$1.35; 6 alike for \$2.60; 12 alike for \$5.00. Post Paid.

Box II—Containing the following large flowering varieties; **Jane Cowl** - coppery yellow. **Gallant Fox** - scarlet. **White King** - white.

GLADIOLUS BULBS

Loveland Glad Gardens, a division of Kroh Bros. Nurseries, has supplied bulbs of choice varieties to many satisfied customers in this area and throughout the country. Varieties listed are carefully selected for their beauty, vigor, and dependable performance.

Glads are quite easily grown and are not exacting as to soil. For best results we suggest they be planted in rows of 18 to 24 inches apart with about 3 large bulbs or 5 to 6 medium bulbs per lineal foot. Of most importance is the planting of good varieties and young vigorous bulbs.

We offer in this listing two sizes "large" and "medium"; both bloom quite freely with average care. A large bulb should produce a little taller spike with 2-4 more buds. Small size and bulblets available on inquiry.

PRICES quoted are Post Paid on orders of \$3.50 or more. Smaller orders add 10% for postage.

GLADIOLUS BULBS are measured in diameter only. Large 1¼ inch up. (Medium ¾ inch to 1¼ inch.)

A.A.G.S. INTRODUCTIONS

The following All-American Gladiolus Selections are the first to be awarded and should prove to be the finest Glads introduced this year.

NEW 1957 A.A.G.S.

GLAD CATALOG giving more complete description and larger quantity prices mailed on request to Glad fans.

TREE TALK

Thousands of progressive folks will be doing new planting come spring.

The saying, "Its Not A Home Until Its Planted" is not just a mere slogan. It has become as basic a part of the home owner's domain as paint on the walls or furniture in the living room—and the family would certainly miss not having a planting around the home.

The thrifty person can't go wrong by investing in nursery stock for his property, since it starts increasing in value from the time it is planted. Then too, it is remarkable that the cost of nursery stock is moderate in view of the very high proportion of labor involved in its production.

It enables the giving of a plant or credit to apply in any season to be furnished by us at the proper planting time. Plant, or plants desired may be left to your loved ones choice. One of the most appreciated remembrances regardless of the occasion: Christmas, Birthdays, Mother's Day, Anniversaries.

"PLANT 'EM GROWING"

We have pioneered the introduction of container-established ornamentals for and in the Plains Region as part of our constant effort to better serve our area. The successful use of Potted Roses over the past decade encouraged us to expand this method of handling plants to include most of the ornamentals adaptable to our climate. Complete home plantings by us using a variety of container-established plants during the past two dry summers without the loss of a single plant has proven the practical and desirable use of "Plant 'em Growing" to supplement the normal short spring season for dormant plants. Bulkiness and weight of container somewhat limits the size of Ornamental shrubs and trees available to the more medium grades. Though smaller, in some instances, than larger sizes cataloged for spring planting, they offer considerable immediate effect as the customary "cutting back" while transplanting is not necessary.

Added production and maintainance costs require a slightly higher price in general for container established stock than dormant spring prices as quoted in Our Catalog for comparable material. This additional cost is soon overcome in the light of faultless continued growth, convenience of summer planting, and immediate effect gained by planting ornamentals in full growth and possibly in bloom.

"Plant 'em Growing" is rapidly becoming popular with many of our patrons and we invite you too, to see the possibilities container-established Ornamentals offer.
